

With a visual interface that is easy to use for any user with basic computer skills, this software is adapted for use in multi-user networks.

Structured in independent modules, it allows you to manage customer orders, purchases from suppliers, greenhouse space, planting schedules, payments, and much more.

Administrative management

[illegible]

CONIC-SOFT comprehensive management software for seedbeds offers complete administrative management with order control, delivery notes and invoices.

It includes a customer and supplier database, facilitating the organization and monitoring of all commercial operations.

Space management

The software allows for the management of space in greenhouses, organizing the position and location of items.

In addition, it manages tasks using worksheets, ensuring efficient and organized operation.

Traceability

CONIC-SOFT ensures the traceability of all plants, from sowing to delivery. This allows for detailed tracking of each plant, improving the quality and efficiency of the production process.
