

SMART RAIN MICRO Micro-sprinkler system

Modular micro-sprinkler technology for efficient irrigation control in nurseries.

Smart Rain Micro is Smart Sowing's solution for automating micro-sprinkler irrigation using micro-sprinklers. Designed for seedbeds that do not use mobile systems, this system allows for precise, scalable and fully automated zone irrigation management.

What does Smart Rain Micro offer?

- Sectorized irrigation, with independent control by zone.
- Compatible with micro-spray irrigation, particularly effective in the early stages of cultivation.
- Automation using PIC-300 electronic cards, specifically designed for intensive production environments.
- Connection to environmental sensors to adjust irrigation intelligently.
- Complete management through CONIC SOFT, Smart Sowing's digital control and traceability platform.

CONIC SOFT – Comprehensive Management Platform

The digital heart of the system.

CONIC SOFT allows you to::

- Schedule irrigation, treatments and fertigation from any device.
- Record and consult irrigation history by date, area and crop type.
- Obtain automatic reports and complete traceability for each production batch.
- Coordinate irrigation with other seedling operations (sowing, transplanting, treatments, etc.).
- Monitor the status of the system, alarms and consumption in real time.

A powerful tool for nursery operators seeking control, **efficiency and professionalization of their irrigation system.**

SMART RAIN MICRO

Micro-sprinkler system

A solution that grows with you

Smart Rain Micro is designed as a **scalable and modular solution**. You can start with a few irrigation zones and expand the system as your nursery grows. Its flexible architecture allows it to adapt to multiple configurations, without the need for major construction work or high initial investments.

Benefits for your nursery

- **Resource optimisation:** reduces water, fertiliser and energy consumption.
- **Greater uniformity and plant quality.**
- **Save time and labour** with automated irrigation and remote monitoring.
- **Data-driven decisions**, thanks to CONIC SOFT records.
- Future integration with other **Smart Sowing Systems** modules.

Smart Rain Micro + CONIC SOFT

Automate, control and improve the management of your nursery.
