

DECOP-T Seeding Head Test Sowing Head

**Do you spend your day sowing small quantities of seed
10 by 10, or 100 by 100?**

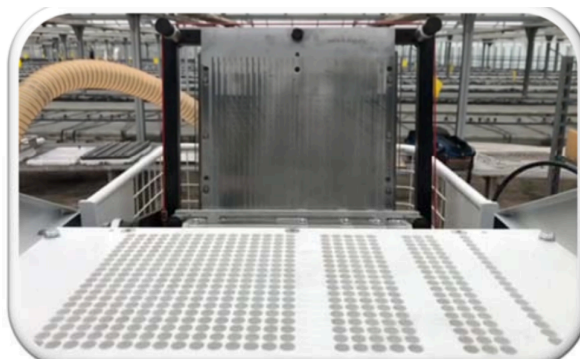

Here's your solution:

With the DECOP seeding head, you can sow small amounts of seed in any type of tray. You can sow row by row, in groups of several rows, or half trays however you prefer.

Discover how you can improve your work
with CONIC DECOP

- **Save time**
- **Sow with precision and safety**
- **Combine different configurations**
- **Suitable for all types of seeds**

CONTROL VISIO
by CONIC SYSTEM

ARTIFICIAL VISION

Combine it with our artificial vision system — for greater control, enhanced safety, and full data recording.

An essential tool for:

Seedling producers
Universities
Research centers

**Don't waste more time contact us, tell us what you need,
and we'll find the easiest way to make it happen!**

DECOP-T Seeding Head Test Sowing Head

Customize your sowing combinations

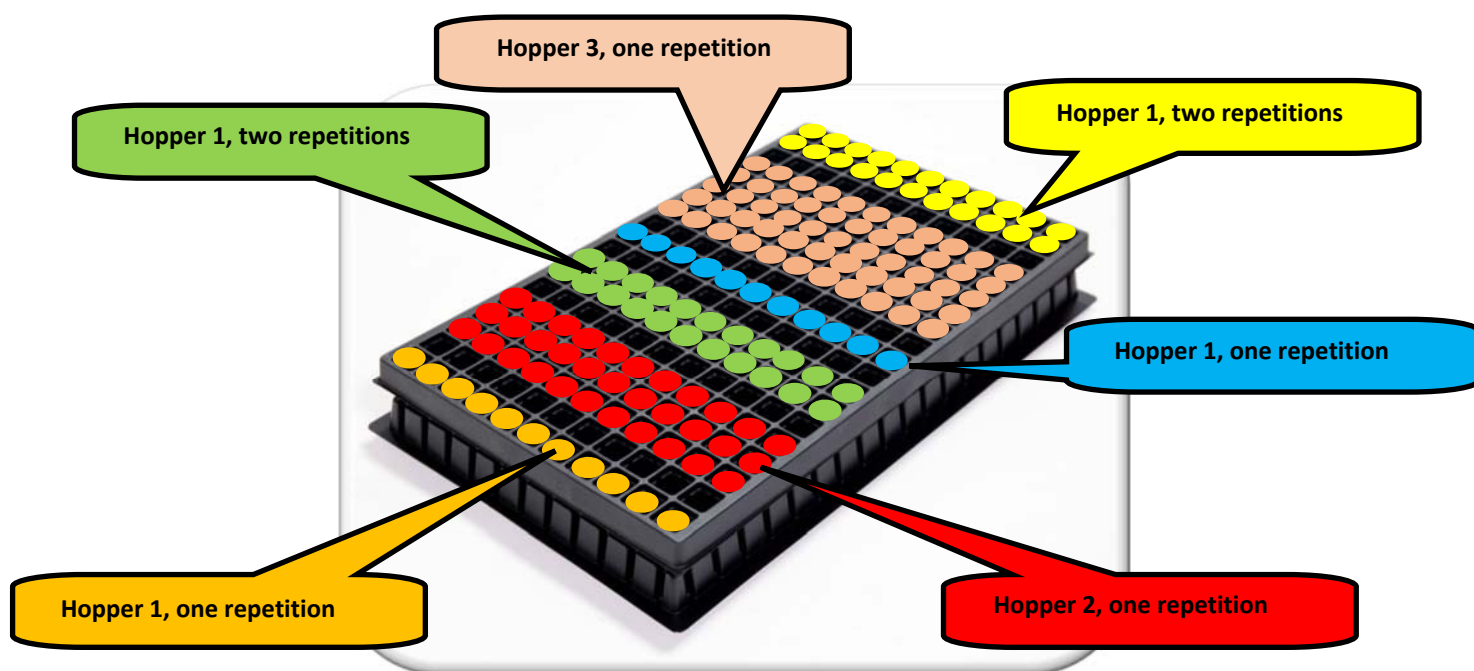

We configure the seed hoppers according to your specific needs:

Hopper 1: ONE ROW

Hopper 2: THREE ROWS

Hopper 3: FIVE ROWS

Place the seed in the desired hopper, select on the screen which hopper you want to use, and define how many rows to leave empty between each sowing.

You can combine plates and combs to sow any type of seed. With the DECOP plate head, you can work with very small seed quantities and easily recover leftover seed using the vacuum system.

If you'd like to run a test, contact us we'll be happy to arrange a demonstration of a nearby unit so you can see how it works.
