

Semi-Automatic Needle Seeder SSN

The SSN Needle Seeder offers **precision, versatility, and efficiency** in the seeding process.

- **Efficient production:** up to 150 trays per hour.
- **All types of seeds and trays:** cell packs, thermoformed or polystyrene trays.
- **Energy saving:** operates exclusively with compressed air, reducing costs compared to electric systems.
- **Automatic and reliable process:**
 - 👉 Substrate dibbling.
 - 👉 Accurate suction and placement of the seed in each cell.
 - 👉 Recovery of surplus seeds.

- **Quick format change:**

interchangeable kits allow adaptation to different tray types within minutes.

- **Seeding adapted to each crop:**

nozzles with different diameters, multi-hole options for multiple seeds per cell, or silicone nozzles for pelleted seeds.

Designed for continuous work:

robust, reliable, and requiring minimal maintenance.
